

**Press Release
Monaco, 6th June 2024**

EVER Monaco, for cleaner travel and energy

- **The 19th edition of EVER Monaco is being held on 13th and 14th November 2024 at the Grimaldi Forum, Monaco's international convention centre.**
- **EVER Monaco is revealing the list of activities proposed over this key two-day event offering an exhibition and a forum for exchange.**
- **The AVERE E-Mobility Conference, which brings together players from the world of transport and vehicle charging at a European level is taking place on the same dates in partnership with EVER Monaco**

EVER Monaco was created in 2006. It is an exhibition and a forum for exchange dedicated to the future of our energy and travel. EVER Monaco is a cutting-edge event and one of the longest-running conventions focused on issues currently at the heart of our concerns. EVER Monaco is a key communication channel for its exhibitors, and many technologies, vehicles and prototypes have been unveiled there.

On land, in water or in the air, EVER Monaco is an event open to all types of mobility, all kinds of energy and all activities in relation to these topics, provided that they help to protect our environment.

What can you do and see at EVER Monaco?

The activities are numerous and varied: this 19th edition will be packed with various events.

- The exhibition – discover the latest discoveries the world of mobility and energy has to offer, but that's not all

Free access to all, the exhibition offers visitors the opportunity to discover exhibitor stands at their leisure, to have a chat with the teams present and to discover new products – sometimes even before their market launch. Exhibitors can be energy or mobility suppliers of all sorts, but also players involved in sustainable building and all the ecosystems related to these issues. Institutes are also represented.

- The Ride & Drive – test everything that is a green drive

Have you ever wanted to try the latest models of electric cars, vans, bikes or micro-mobility?

The Ride & Drive is a test drive area reserved for all types of land vehicles. Located just in front of the Grimaldi Forum, you'll get the opportunity to drive along the streets of the Principality supervised by a team of professional demonstrators.

- Startups – attend the pitch sessions, uncover emerging talents

EVER Monaco will be welcoming young businesses so that they can present their projects under the best conditions. A special area at the heart of the exhibition with preferential rates has been reserved for them.

For this 2024 edition, EVER Monaco will also be hosting the **European Startup Prize**, which rewards companies most likely to help advance clean mobility. The opening ceremony will be held at 5.30 pm on 13th November as part of EVER Monaco at the Grimaldi Forum. The European Startup Prize is a public/private initiative co-founded in 2017 by the President of the European Parliament's Committee on Transport and Tourism. It involves supporting and assisting the best innovative projects in terms of sustainable mobility in their European expansion.

- Round Tables – delve into topical issues

Over the two days EVER Monaco's traditional Round Table sessions will take place on Electromobility and the Energy Transition. The provisional programme will be published soon.

10th edition of the Riviera Electric Challenge – enjoy the era of the electric rally

This regularity sports event is the result of collaboration between EVER Monaco and the Cagnes-sur-Mer Town Council (06), the town that has hosted the start of the race since 2015. For this anniversary edition, the rally will leave from the Grimaldi Forum forecourt on Wednesday 13th November, the first day of EVER Monaco. After the initial stage which will take the participants to Italy, the arrival will be celebrated on Thursday 14th November at Château Grimaldi in Cagnes-sur-Mer.

- AEC – listen to Europe's leading figures discuss key-topics

This year, EVER Monaco is being held in conjunction with the **AVERE E-Mobility Conference (AEC)**, which is one of the key events organised by AVERE, the European Association for Electromobility. AVERE represents and advocates for electromobility on behalf of the industry, academia, and electric vehicle users at European level, as well as in each of its member countries.

EVER Monaco supporters and sponsors

EVER Monaco is supported in its actions by the Prince Albert II of Monaco Foundation, which is dedicated to environmental protection and sustainable development, as well as by SMEG (Société Monégasque de l'Électricité et du Gaz), a key player in the energy transition for more than 130 years in the Principality.
